Scope SEC filings · IR materials · sell-side distribution · board materials

This Rider is incorporated by reference into the Narrative Geo order form.

It licenses attributed external publication of platform outputs without per-use approval.

Narrative Geo — License-to-Publish Rider

Rider to the Narrative Geo Subscription Agreement between Nan Point Group ("Provider") and the customer named on the order form ("Licensee"). Version 1.0 · 2026-06-09

1. Purpose

The base subscription licenses internal use of the Narrative Geo platform and its deliverables. This Rider additionally licenses **attributed external publication** of platform outputs in the channels enumerated in §2, without per-use approval from Provider.

2. Licensed Publication Channels

Licensee may reproduce figures, charts, tables, and map images generated by the platform in:

#	Channel	Examples
2.1	SEC filings	10-K, 10-Q, 8-K, proxy statements, registration statements
2.2	Investor-relations materials	IR website, investor-day decks and livestreams, earnings-call prepared remarks and Q&A, shareholder letters
2.3	Sell-side distribution	Figures reproduced by third-party research analysts in notes covering Licensee, where the figure originated from Licensee's licensed deliverables
2.4	Board and internal strategy materials	Unrestricted internal use (already covered by the base license; restated here for completeness)

3. Conditions

- Attribution.** Each published figure carries the citation: *"Source: Narrative Geo (methodology v{version}, data refresh {date})"* — both values appear in the footer of every deliverable. Where space-constrained (e.g., a chart axis), "Source: Narrative Geo" suffices if the full citation appears in the document's source notes.
- Version anchor.** Published figures must reference the version-pinned URL provided with the deliverable (Methodology White Paper §10.5), which holds the methodology version, data vintage, and software stack immutable.

3. **Fidelity.** Figures must be quoted with their stated drive-time tier, threshold, and cohort. Republication that drops the tier or threshold qualifier is outside this license.
4. **No data redistribution.** This Rider licenses *figures and conclusions*, not data. Cell-level exports (H3 cell IDs, per-cell demographics) may not be resold, redistributed, or published in bulk.

4. Survival

Any figure published in a licensed channel during the contract term remains licensed in perpetuity for that publication. A cited figure in an SEC filing never becomes retroactively unlicensed by contract expiry or termination.

5. Provider Representations

Provider represents that: (a) the deliverable was generated by the methodology described in the version-pinned Methodology White Paper; (b) the underlying data sources are licensed for this use (U.S. Census ACS and LEHD LODES are public domain; OpenStreetMap under ODbL with derivative-database obligations satisfied by Provider; store coordinates from first-party public sources); and (c) the CSV audit trail (Methodology §10.6) will remain available to Licensee for the contract term for any published figure.

6. Indemnity Scope (summary — see Master Agreement)

Provider's indemnity covers third-party claims that the platform's methodology description materially misstates the procedure used. It does not extend to Licensee's characterizations beyond the published figure or to forward-looking statements Licensee constructs from platform outputs.

Execution: this Rider is incorporated by reference into the order form. No signature beyond the order form is required.
